Sky Stream For Crestron Home

Revision: 1.01
Date: 13 October 2026

Supported Installation

This is a Crestron Home driver for Crestron Home processors.

Description

This driver allows you to control your Sky Stream device. The MAC address needs to be provided as the Sky box will go into a deep sleep after a period of inactivity and needs to be woken up using Wake on Lan for functionality to return.

Installation

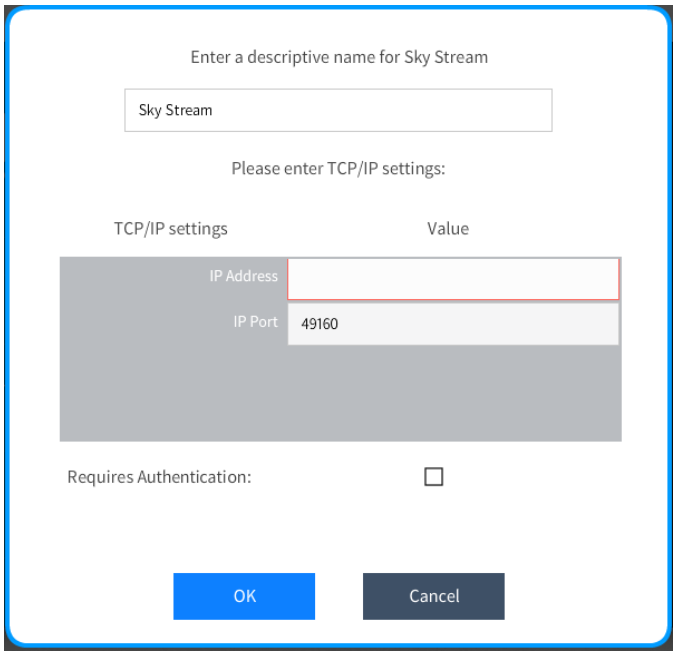

The driver can be found under:

Drivers > Cable Box > Sky

Adding the Driver

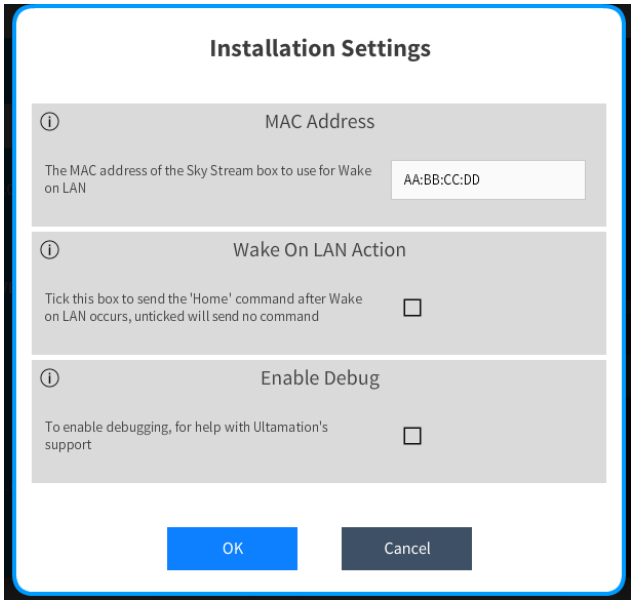

Ensure a room is selected, and then click on the '+' against the appropriate device.

You will be asked to provide a descriptive name – this can be anything you wish. Enter the IP address of the Sky Device, the port can be left default.

If you do not have a cloud licence, the system will function for ONE hour and then control will be suspended.

COPYRIGHT © 2026 ULTAMATION LIMITED

You will then be asked to enter the MAC address of the sky device to be used for Wake On LAN. You can also choose to have the “Home” button pressed after Wake on LAN so that the TV will always go to the Home menu after it is woken up by a button press.

There is also a toggle to enable debug, this should only be used for when issues occur, and you contact Ultamation. Before contacting support, please tick Enable Debug and use Toolbox’s Text Console to collect the error logs with the “err” command.

Support

If you have any issues with an integration solution please let us know by contacting Ultamation support on support@ultamation.com and please include as much detail about your issue as possible, such as a recent processor error log.

Licence verification messages are posted to the error log, so please ensure you have checked this.

Licensing

This integration solution (including software, images and all other associated assets distributed as part of the purchased download package) is licensed on a PER PROCESSOR PER DEVICE basis.

A purchase should not be completed without correct information as refunds cannot be issued for errors or changes made to details following purchase.

This is an electronic product and there is no physical delivery.

The integration solution is provided without any warranty with respect to the reliability of the controlled device or changes to device protocol. We will endeavour, through best efforts, to maintain the integration solution's functionality and any bug fixes will be provided free-of-charge. Additional functionality may be released as a variation of this integration solution and this will be a separate, purchasable, product.

Cloud Licence

This integration solution contacts Ultamation's licensing server at startup. If the server finds a matching licence for the integration solution and processor then the integration solution will be licensed. If you purchase a licence **after** you have loaded the integration solution, please reboot the system to see changes take effect.

COPYRIGHT © 2026 ULTAMATION LIMITED

If no licence exists for the product/processor the integration solution will enter a short trial period (ONE HOUR) to allow for verification of correct control or evaluation.
